

## GENERAL INDEX, VOLUME I.

[NOTE.—Names of authors and debaters in SMALL CAPS ; titles of papers in *italics*.]

	PAGE
Absorptive power of vapor .....	183
<i>Adaptation of Bessemer plant to basic process</i> , A. S. Holley .....	130
Address, Inaugural, of R. H. Thurston, 1880 .....	13
Admission of steam, angle for .....	23
Annual meeting of 1880 .....	1
 BARCOCK, GEO. H., disc., friction as a factor .....	149
<i>Basic process, adaptation of Bessemer plant for</i> .....	130
Bessemer plant, adaption for basic process .....	130
Bessemer process, output in .....	138
Boiler for high pressures .....	268
 Carbonic oxide gas for boilers .....	270
CHURCH, W. L., disc., expansion in single and compound engines .....	177
“ “ “ friction as a factor .....	152
Clearances in compound engines .....	173
Coefficients of friction at 100° .....	89
Combustion chamber .....	270
Committee on nominations, 1880 .....	3
“ “ rules, 1880 .....	4
“ “ standing, appointed 1880 .....	6
Compound engines, economy and cost of .....	186
“ “ clearances in .....	173
“ “ uniform rotation in .....	174
“ “ “ propulsive energy of .....	178
“ “ coal per H. P. in .....	186
“ “ cost of .....	186
“ “ high ratios of expansion in .....	153
“ “ governor in .....	177
“ “ and single, economy of .....	28
“ “ receiver of .....	176
“ “ wire drawing in .....	173
“ “ pumping at Toronto .....	178
Condensation in steam jackets .....	172
Corliss engine at Pawtucket .....	172
Cost of compound engine .....	186
“ lubricant .....	117
COTTER, JOHN, disc., expansion in single and compound engine .....	180
“ “ “ friction of oils .....	114
<i>Crank, efficiency of the</i> , S. W. Robinson .....	218
“ overhanging .....	150
“ pin friction at .....	151-236
“ “ pressures on .....	115 and 175
“ “ of S. S. Knickerbocker .....	70
<i>Cushion-adjustment in engines</i> , S. W. Robinson .....	252
Cylinder condensation .....	182

	PAGE
Defects of indicator diagrams.....	187
Dephosphorizing by fluorine.....	136
Diagram of friction of lubricating oils.....	78, 77
"    "    oil at different pressures.....	83
"    "    power for spinning frame.....	86
Disengagement area in boilers.....	265
DuFAUR, A. F., disc., expansion in single and compound engines.....	177
"    "    methods for economy of fuel.....	270
Economy of fuel in steam engines, methods for.....	261
"    "    "    single engine.....	26
"    "    low speed in engines.....	28
Efficiency of steam jacket.....	175, 190
"    " <i>the crank</i> , S. W. Robinson.....	218
EGLESTON, T., disc., regenerating metallurgic furnaces.....	63
"    "    standard screw threads.....	128
"    "    methods for economy of fuel.....	269
EMERY, C. E., " President's inaugural, 1880.....	28
"    "    metric system.....	52
"    "    strength in machine tools.....	120
"    "    expansion in single and compound engine.....	181
Engines of S.S. Iris.....	224
"    three-cylinder.....	177
Expansion of air and steam.....	217
" <i>in single and compound engines</i> , J. C. Hoadley.....	153
Experiments at Novelty Iron Works.....	184
<i>Field of mechanical engineering</i> , A. L. Holley.....	7
Fluorine as dephosphorizer.....	136
FORNEY, M. N., disc., standard screw threads.....	127
"    "    economy of fuel in the steam engine.....	269
<i>Friction as a factor in motive power expenses</i> , J. E. Sweet.....	141
"    coefficients of.....	89
"    of lubricating oils, measurement of.....	74
"    locomotives.....	150
"    metals under steam.....	149
"    on crank pin.....	151
Fuel in single engine.....	28
Gas-firing for boilers.....	270
GILL, JOHN L., disc., metric system.....	54
Glass cylinder, condensation in.....	183
GORDON, FRED. W., disc., regenerating metallurgic furnaces.....	63
"    "    efficiency of crank.....	237
"    "    economy of fuel in the steam engine.....	270
Governor in factory compound engine.....	177
Graphic solution for efficiency of crank.....	228
Grit in steam chest.....	148
HAGUE, C. A., mechanical correctness.....	238
HEMENWAY, F. F., disc., methods for economy of fuel.....	267
"    "    packing for rods and stems.....	248
HODLEY, J. C., expansion in single and compound engines.....	153
HOLLEY, A. L., <i>The field of mechanical engineering</i> .....	7
"    "    adaptation of Bessemer plant for basic process.....	130
"    "    disc., regenerating metallurgic furnaces.....	62
"    "    methods of economy of fuel.....	268
HOLLOWAY, J. F., disc., expansion in single and compound engines.....	180

	PAGE
Inaugural address, 1880, R. H. Thurston .....	13
Indicators, errors of .....	187
Iris, engine of S.S. ....	224
Isherwood's tests on U. S. steamers .....	186
 JOHNSON LEWIS, crank-pin of S.S. <i>Knickerbocker</i> .....	 70
<i>Knickerbocker</i> S.S., putting a new crank-pin in .....	70
Lathe spindles .....	121
Lead of valves .....	151
Lead screws .....	128
LEAVITT, E. D., Jr., disc., expansion in single and compound engines .....	168
Low-speed in engines .....	28
Lubricated surfaces, pressure on .....	114
Lubricating oils, measurement of friction of .....	74
Lubrication at high temperatures .....	116
LYNE, LEWIS F., packing for piston rods and valve stems .....	241
 <i>Measurements of friction of lubricating oils</i> , C. J. H. Woodbury .....	 74
<i>Mechanical correctness</i> , C. A. Hague .....	238
Mechanical engineering, field of .....	7
Mechanical theory of heat, study of .....	2:9
<i>Metric system</i> , Coleman Sellers .....	36
"    "    calculations in .....	39
"    "    F. A. P. Barnard on .....	33
"    "    scales for drawings in .....	38
"    "    standard sizes for .....	43
 Novelty iron works, experiments .....	 183
Oils, lubricating, friction of .....	74
Output in Bessemer process, 1880 .....	138
 <i>Packing for piston rods and valve stems</i> , L. F. Lyne .....	 241
Percentage of friction in mills .....	114
Perkins' marine engine .....	186
PORTER, C. T., strength of machine tools .....	119
"    "    disc., efficiency of the crank .....	235
"    "    "    expansion in single and compound engines .....	175
"    "    "    friction as a factor .....	148
"    "    "    friction of oils .....	114
"    "    "    metric system .....	53
"    "    "    standard screw threads .....	126
<i>Practical methods for economy of fuel in the steam engine</i> , A. Stirling .....	261
Preliminary meeting for organization .....	4
President's inaugural, 1880, R. H. Thurston .....	13
Pressure on lubricated surfaces .....	114
Prevention of smoke in boilers .....	269
Proceedings, New York, 1880 .....	1
Pumping engines, speed of .....	180
 Receiver of compound engine .....	 176
"    engine, wire-drawing in .....	172
Reciprocating parts, weight of .....	149
REESE, JACOB, regenerating metallurgic furnaces .....	58
<i>Regenerating metallurgic furnaces</i> , Jacob Reese .....	58
Reheating in receiver engine .....	176

	PAGE
Report of secretary, 1880 .....	3
“ “ treasurer .....	5
Resolution on metric system .....	55
ROBINSON, S. W., efficiency of the crank .....	218
“ “ cushion adjustment in engines .....	252
“ “ disc., expansion in single and compound engines .....	172
“ “ friction as a factor .....	151
Screw threads, standard sizes for .....	122
“ “ in R. R. work .....	127
SELLERS, COLEMAN, metric system .....	30
“ “ disc., strength of machine tools .....	121
“ “ “ standard screw threads .....	126
Single and compound engine, relative economy of .....	8
Smoke prevention .....	269
Speed of compound engine .....	168
Standard sizes for screw threads, G. R. Stetson .....	122
Steam jacket, efficiency of .....	169-185, 190
STETSON, GEO. R., standard sizes for screw threads .....	122
“ “ disc., friction of lubricating oils .....	117
“ “ “ metric system .....	52
STIRLING, ALLAN, practical methods for economy of fuel in the steam engine .....	261
“ “ disc., friction of oils .....	114
“ “ “ packing for rods and stems .....	248
“ “ “ standard screw threads .....	126
Strength in machine tools, C. T. Porter .....	119
SWEET, JNO. E., friction as a factor in motive power expenses .....	141
“ “ disc., expansion in single and compound engine .....	174
“ “ “ packing for rods and stems .....	248
“ “ “ standard screw threads .....	126
Table for cushion adjustment in engines .....	257
“ “ efficiency of crank .....	227
“ “ crank bearings .....	233
“ “ friction of oils .....	89
“ “ pipe-threads .....	51
“ “ of tests of oils .....	90
“ “ Whitworth's screws .....	49
“ “ rotative effort in compound engine .....	164
Tandem compound engines .....	181
Temperature determining efficiency of crank .....	231
Test of oils .....	89
“ “ frictional .....	96-108
“ “ fluidity .....	108-113
“ “ of U. S. steamers .....	185
Three cylinder engines .....	177
THURSTON, R. H., address, inaugural, 1880 .....	13
“ “ disc., efficiency of crank .....	236
“ “ “ friction as a factor .....	150
“ “ “ friction of lubricating oils .....	114
“ “ “ Basic Bessemer plant .....	136
Toronto Worthington pumping engine .....	178
Travel of slide-valves .....	149
Variable load in compound engine .....	177
Water per H. P. in compound engine .....	169
WEBBER, SAMUEL, disc., expansion in single and compound engines .....	186

	PAGE
WEIGHTMAN, W. H., disc., standard screw threads.....	129
Whitworth, Sir Joseph, screws .....	49
"    "    threads for screws.....	126
Wire-drawing in the receiver engine .....	172
WOLFF, A. R., value of the study of the mechanical theory of heat.....	209
WOODBURY, C. J. H., measurements of the friction of lubricating oils.....	74
"    "    disc., expansion in single and compound engines.....	172
"    "    friction as a factor .....	150
WORTHINGTON, HENRY R., disc., expansion in single and compound engines..	178
"    "    "    friction of oils.....	114
"    "    "    metric system.....	53
"    "    "    study of mechanical theory of heat .....	217
